DETAILED ACTION

1. Amendment filed on 6/27/05 has been received.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 6-9, 19-24, 26, 31, 32 and 35-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mann et al in view of Maslonka et al (U. S. Patent no. 6,322,161).

Mann et al discloses: brake lock device 68, door lock device 18 (see also column 7 line 9), control unit 16, control mechanism 12, 14

Mann et al does not disclose automatically activating the brakes based on pre-selected criteria. Maslonka et al teaches locking the brakes by venting based on pre-selected criteria.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to open a valve to vent the air pressure to lock the brakes as taught by Maslonka et al in the system of Mann in order to prevent accidents and to stop the vehicle in emergency situations.

Regarding claims 6, 7, 25, 26, and 32, see Maslonka et al low pressure switch figure 12 B and column 13 lines 5-10

Regarding claim 16 29, the examiner takes official notice the electromechanical actuators are well known and it would have been obvious to use an electromechanical actuator in the device of Mann, as modified, as electrical lines are more robust and easier to install than pressure lines.

Regarding claims 17 18 , see Mann alarm control means 48 with reed switch (relay),column 4 line 66 – column 5 line 4

4. Claims 4, 5, 23, and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 1-3 6-9 19-24,26,31,32 have been considered but are moot in view of the new ground(s) of rejection. Applicants argue that no prior art teaches the limitations of claims 22 and 31. This is incorrect. Mann clearly shows the use of wireless communications.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
